The Uplogix 3200 delivers advanced remote management capabilities for data centers, branch offices and remote locations on a robust and flexible platform. With integrated functionality for access, control and enforcement, Uplogix ARM appliances can automate as much as 70% of routine network maintenance functions and autonomously address the majority of issues that cause network-related outages.

### Key Benefits:

- ▶ **Flexible** | Offers a variety of configurations and remote management paths
- ▶ **Scalable** | Designed to scale to meet your remote management needs whether deployed at a remote branch office or a core data center
- ▶ **Robust** | Delivers advanced remote management capabilities for a wide variety of distributed IT assets, including servers and network devices

## Enterprise Scalability & Performance for Automated Remote Management

Uplogix remote management solutions can automate a majority of the routine maintenance and recovery tasks of an IT admin, but faster, error-free and at a fraction of the cost. Uplogix reduces management complexity by delivering integrated, remote management solutions to provide secure remote access and local, in-depth monitoring, as well as configuration, fault and service level management.

### Uplogix 3200 Up Close

**Uplogix' flagship ARM appliance**, the Uplogix 3200 is available in 4-, 8-, 16-, 24- or 32-port models. The Uplogix 3200 is a scalable and robust remote management appliance for enterprises that locally manage an ever-growing infrastructure of distributed networking gear, servers and other IT devices located at remote sites, branch locations and data centers.

The Uplogix 3200 provides persistent connectivity to managed devices through both in-band and out-of-band channels. With the built-in intelligence of the Uplogix Remote Management Operating System (RMOS), the appliance monitors devices locally, performs maintenance or recovery tasks as needed, and constantly enforces security policies—regardless of the state of the network.

Unparalleled management control is possible by interfacing directly through the console port of the devices it manages. This connection enables always-on, localized, round-the-clock management for your IT infrastructure. With integrated functionality for access, control and enforcement, Uplogix ARM appliances can automate as much as 70% of routine network maintenance functions and autonomously address the majority of issues that cause network-related outages. Problems that today might require IT staff on-site physically to resolve are detected by the Uplogix in seconds, and fixed in minutes.

## SYSTEM SPECIFICATIONS

### System

- ▶ Network interfaces: Supports up to 32 network devices via serial (RS-232), and 16 auto-sensing 10/100 BaseT Ethernet interfaces
- ▶ Management interfaces: Two 10/100 BaseT Ethernet interfaces (with failover support) and one RS-232 console port
- ▶ On-board storage: 40GB
- ▶ Peripheral connectivity: One RS232 power management port, one RJ-11 modem port, and two USB ports

### Dimensions and Weight

- ▶ Height and Width: 45 mm (1.75 in.) x 486 mm (17.1 in.); 1 rack unit (1RU)
- ▶ Depth / Weight: 500 mm (17.5 in.) / 11.79 kg (26 lbs.)

### Operating Environment

- ▶ Power Consumption: 120 W
- ▶ 5° C to 50° C / 5% to 95% relative humidity, non-condensing

### Regulation

- ▶ Emissions: FCC class A sub part B
- ▶ Safety: UL 1950 (USA), CSA 950 (Canada)

**ABOUT UPLOGIX** | Uplogix provides the first fully-integrated remote management solution. Our collocated management appliances automate routine administration, maintenance and recovery tasks—securely and regardless of network availability. In comparison, traditional network and systems management depends on the network, uses multiple tools, and remains labor intensive. Uplogix puts the power of your most trusted IT administrator everywhere, all the time.

Uplogix is privately held and headquartered in Austin, Texas with European offices in London. For more information, please visit [www.uplogix.com](http://www.uplogix.com).
